

Make Changing Easy

Saye Mobile Changer

Room to room

The Saye changer is a fully mobile changing table that requires no installation or fixing. Its compact and slimline design means it can be easily manoeuvred from room to room, offering an extremely cost effective option for multi-transfer or multi-user environments.

Height adjustable

The electrically operated Saye changer provides an excellent travel range of 480mm and can be lowered and elevated at the touch of a button. Safe and suitable working heights can be easily achieved which helps prevent the risk of back injury to the carer.

Easy transfers

The Saye changer has been designed to ensure sufficient clearance for a wide number of hoists. Its mobility and unique stowaway side rails enable safe and easy handling. Whether you are transferring from a bed, wheelchair or toileting chair, the Saye changer is the perfect solution.

- Folds away to save on space
- Easy to clean padded surfaces
- Available in other sizes, pricing on request

Robust yet slimline

Sark is a battery operated wall mounted changing table that is suitable for children and adults of up to 200kg. Despite its robust structure, the Sark has a slimline design that ensures it fits easily into most environments.

Sizes to suit

We understand that every need is different, which is why the Sark comes in seven different sizes that cater from young children through to adults. 1800mm is our standard stock size.

Easy transfer

The Sark has been designed so that it can be used with most mobile or ceiling hoists. The unique safety side rail stows away, streamlining access for transfers from a wheelchair, shower and toileting chair. The Sark also benefits from an impressive travel range of 600mm.
