# RAIZER®

by Liftup

Raizer is a mobile lifting chair that helps people who find themselves on the floor to be up again in just a few minutes. Raizer can be operated by a single assistant and requires only limited physical effort beyond the help of a supportive hand.

# Raizer guarantees a safe and stable lift

- Can be operated by one person
- Is battery-driven and lifts automatically.
- Quick and easy assembly (3 min.) right next to the person on the floor.
- Ensures an ergonomically correct lift, avoiding overexertion of your back and arms.

- Can be controlled both remotely, allowing you to work in your optimal working posture, or by using a button on the seat.
- If the patient is ill, Raizer can lower the person gradually into a horizontal position.
- Gentle for both staff and patient.
- Raizer ensures a dignified lift for the patient.

# Minimal manual handling

- Easy to transport using trolley or two bags.
- Raizer can easily be stored and charged in a central place in the hospital such as a storeroom.
- Lifting using Raizer requires only a minimum of physical effort.
- It is easy to transport around in buildings and confined spaces.
- It is easy to operate in limited space and can lift from floor height.
- Raizer requires only minimal training, so is easy to use for inexperienced staff.
- Staff are trained quickly and easily thanks to Raizer's easy handling qualities.
- Uniform surface treatment ensures easy cleaning and disinfection.

# AN EXCELLENT INVESTMENT, BOTH PRACTICAL AND ECONOMICAL

- Colour-coded parts for easy assembly.
- Extra equipment such as a trolley (with stair wheels) and remote control available for purchase.
- Quick and easy disassembly and packing (2 min.)
- Can be used on all types of surfaces.
- Easy to clean and disinfect.
- An excellent time-saving investment.
- Relieves a stressful situation, so letting staff quickly move on to the next patient.
- Savings from using Raizer can be documented.
- Contact Liftup for more information relevant to your situation and needs.

- Lifting time: 20–30 sec.
- Dead weight: (seat: 9 kg/legs and back rest: 4 kg). In total: 13 kg.
- Charger (2 pcs.): 12 V, 90–264 V, < 20 W and 12 V car adapter
- Number of lifts when fully charged: 40 lifts with a max. load. Approx. 100 lifts with an average load.
- Charging time: max. 6 hours.
- Charging of depleted battery: 10–15 min. for a single lift.
- CE-mark.
- Patent pending.
- Registered design.

# Equal opportunities for all

At Liftup A/S our principle is to work continually with the innovative development of welfare technology products.

At Liftup A/S our principle is to work continually with the innovative development of welfare technology products. Liftup was founded in 2003, and is a wholly privately-owned Danish enterprise.

Aesthetics, design and safety are crucial to everything we do within the field of welfare technology.

We don't make machines, we make welfare aids that guarantee the dignity of their users.
